From the Editor-in-Chief's Desk

Dear Readers

The next issue of the News Letter has just been out containing usual features. This issue contains two Articles of interest for the candidates titled (1) Whopping benefits from Dams & (2) Selection of Binder for Bituminous Surfacing : A Critical Appraisal.

In the first article emphasis has been given on the improvised Dam design, technology which may be adopted extensively throughout the Country. The Authors of the Article hold the view that Construction of low cost cyclic dykes for ground water recharge should form a part of the construction of the dam project itself. The improvised irrigation distribution system should be applied everywhere so as to make substantial saving of precious water. The innovative afforestation should become a part of the dam construction activity itself, thereby delivering improved benefit cost ratios. This will also result in earning of CARBON CREDITS for the country at the International level.

In the second article the Author has presented a Critical Appraisal of Selection of Binder for Bituminous Surfacing. Looking to the merits of the modified Bitumen technology the same was adopted by highway profession for various road projects. However, the

Indian Road Congress published an article on Tentative Guidelines for the Design of Flexible Pavements and recommended use of VG40 grade Bitumen. What is being strongly felt that before arriving at any final decision NHA should sponsor a study for a comparative performance of Modified Bitumen and VG 40 in different climatic zones and traffic conditions before adopting VG 40 as a binder for wearing coat or structural layers. We have therefore, to wait and watch for the final outcome

ICE (I) also celebrated its Engineers' Day on 15th September, 2016 to commemorate the birth anniversary of Sir M Visvesvaraya, the legendary and beloved engineer that India has ever produced. The Institution also organized its 6th Convocation in which Prof. Furqan Qamar, Secretary General, Association of Indian Universities was the Chief Guest to deliver the Convocation Address and to give away awards to the recipients of Academic excellence in various fields.

We also declared, Summer-2016 examinations results on August, 17, 2016. My congratulation to all those who have completed their certification requirements and to the others my good wishes to work hard to complete their courses with all sincerity to earn better recognition in the Society.

My regards to you all

Dr. S.L.Swamy
Chairman

Be grateful for your problems, for they stimulate an "I-can-solve-it" attitude.

From the Editor's pen

Dear Readers

The next quarterly issue of the News Letter of ICE (I) titled "Civil Engineer" covering the period from July-September, 2016 is before you.

The quarter under report has been quite hectic and historic. Hectic because ICE(I) organized "Engineers' Day" on 15th September, 2016 when we also had the 6th Convocation. The day was marked by the presence of candidates in Academic Robs, feeling proud of their achievements as they were going to be certified by ICE (I) to earn recognition in the Society enabling them a better status. The Convocation Address by the Chief Guest Prof. Furqan Qamar, Secretary General, Association of Indian Universities was so interesting that the audience was so happy to listen to the

words of wisdom coming from an academician of eminence, a leader and a person exposed to best global practices. He made his lecture very interesting by narrating a story which, he said, he often quoted which highlighted the importance of 1(one) in our lives.

The period has been historic as after the Uri-attack India has given a befitting reply to Pakistan by Surgical Strike. This was necessary from both the angles –(i) To teach lesson to Pakistan and (ii) To revive the feeling of patriotism amongst the Indians to show to the world that whatever be the internal differences we stand united as one body to give blow to anyone who would look to our country with evil eye. Our action has exposed Pakistan and has won favours for India from the leaders world over. Let us resolve to keep the spirit of patriotism alive always.

With my best wishes

Prithipal Singh
Secretary General

An excuse becomes an obstacle in your journey to success, when it is made ; in place of your best effort or when it is used as the object of the blame.

WHOPPING BENEFITS FROM DAMS

(Designed With Innovative Technology in Kandi Area of Punjab)

A. BACKGROUND

With the construction of a dam, greater impact of irrigation facility is seen in the areas adjoining the dam while expanded development takes place all along the banks of the rivulets due to "reduced inundation". In view of the ever growing cost pressures and with an emphasis on enhancing the benefits drawn from these projects, an improvised, innovative dam design technology was evolved in 1994. This technology envisaged absorption of most of the design flood. The major benefits are being briefed here in the following paragraphs;

i. Absorption of Flood Waters –

With the absorption of most of the design flood, replacement of expensive concrete spillway and provision of an auxiliary (katcha) emergency escape channel, the cost of the dam was reduced (upto 30%). The inundation area on the downstream side of dam has experienced a significant reduction.

Benefits –

The near total storage of the design flood has successfully tamed the fury of flash floods. The earlier losses of crop and livestock are nearly zeroed and no compensation is now payable by the Government on that account.

ii. Expanding CCA by tapping reservoir gravity heads –

In the year 2013, a proposal for tapping the gravitational head available in the reservoir and delivering the same at the farm outlets, thereby providing for power free drip/sprinkler irrigation systems was evolved by the authors of this paper.

Fig; The Improved Intake Canopy for Sprinkler/Drip Specific Distribution System

Benefits –

This envisaged saving of around 30% water which is sufficient to generate more than 40% additional CCA without any extra cost on the system. This system has been applied on the Nara dam as a pilot project.

The improvised sprinkler/drip irrigation technology, applied as a pilot project on Nara dam, if applied comprehensively on the entire CCA, has a capability of increasing the CCA by about 150 ha which in turn generates additional benefit of $150 \times 0.196 = 29.4$ lacs per annum.

iii. Ground Water Recharge through Cyclic Dykes D/S of Dams –

In a bid to improve the ever depleting ground water levels, a new technology of providing low cost cyclic dykes in the choe beds, downstream of these dams has been envisaged and is in the process of implementation in the Kandi Area.

Benefits -

The low cost-low height dykes, made out of locally available earth are proposed to be constructed in the choe beds, just after monsoons and are proposed to be implanted with quickly growing shrubs which take their roots early and in turn provide further strength to these dykes. The ponded waters stored behind these dykes remains and facilitate percolation for ground water recharge.

iv. Additional forest cover -

The area now rendered unaffected by the floods within the choe beds which falls in the designated forest area, can now be afforested which consequently enhances the canopy cover.

Benefits -

In the Kandi Area, 719.33 acres of choe lands has already been provided by the Irrigation Department to the Forests Department for afforestation in the choes. On an average, the annual benefit from this additional afforestation per dam shall be Rs. 52.70 lacs per annum as per the latest available data (as per price index of year 2001).

In case the improvised dam design technology is adopted extensively in India, the resultant useful land generation will be very high and shall also result in earning of CARBON CREDITS for the Country at the International level.

Additional CCA D/S of Dams due to reduced inundation -

With the reduction of inundation area along the banks of rivulets d/s of the dams, the culturable area has expanded further, thus enhancing the effective CCA as well as land available for other valuable use.

Benefits -

In the new scenario, the area now left unaffected by flood inundation and within the rivulet beds beyond the forest area is brought under use in different manners.

It can be brought under cultivation in the agriculture stretch while can be utilised by expanding the limits of Municipal Areas. The additional CCA can be averaged grossly at about 45 ha per dam. The annual benefit form additional CCA shall be $45 \times 0.196 = 8.82$ lacs per annum.

vi. Earning of regular revenue

This also is a case of generation of useful land for the State. It not only provides useful land but is a regular revenue earning facility for the State. Once adopted and applied extensively in India, this innovative design technique can generate huge quantities of land for beneficial purposes of varying usefulness.

B. GROSS EVALUATION OF BENEFITS

As detailed above, the annual average additional benefits derived with improvised technology for dams, afforestation, irrigation and flood management amounts to Rs. 90.92 lacs/annum. Projected over 40 years of dam life, this benefit becomes Rs. 3636.80 lacs.

This benefit is in addition to the unquantified benefits from Expanded Municipal Area Limits, Security Against Flash Floods, Cost Reduction In Development Works Across These Rivulets and Additional Ground Water Recharging Through Dykes etc.

C. CONCLUSION

The improvised dam design technology should be adopted extensively throughout the country. Construction

of low cost cyclic dykes for ground water recharge should form a part of the construction of the dam project itself. The improvised irrigation distribution system should be applied everywhere so as to make substantial saving of precious water. The innovative afforestation should become a part of the dam construction activity itself, thereby delivering improved benefit cost ratios. This will also result in earning of CARBON CREDITS for the country at the International level.

Selection of Binder for Bituminous Surfacing A Critical Appraisal

Flexible pavement is used in 90% of road network in India including National Highways as well as Expressways. Bituminous materials are used for base binder and surface courses of flexible pavements. Penetration grade bitumen conforming to IS 73-1992, were used as binder for preparation of different type of mix till 2007. CSIR-CRRI conducted a performance study during 1980-85 to decide appropriate grade of bitumen for different climatic and traffic conditions of India. It was recommended that harder grade bitumen such as 30/40 should be used for heavy traffic conditions, where difference in minimum and maximum air temperature is less than 25°C , whereas 50/60 grade bitumen may be used if traffic is not heavy at these locations. In case difference in maximum and minimum temperature is more than 20°C , 80/100 grade bitumen was recommended for low traffic conditions at these locations and 50/60 grade bitumen was considered better for heavy traffic.

During the decade of 1985-1995, significant increases in traffic loading terms of number as well as axle load was observed. It was also observed that performance of bituminous surfacing did not meet requirement of designed life and performance of roads. Extensive fatigue cracking and rutting was observed in bituminous surfacing at various locations. Reflection of cracking was also observed in SDBC wearing coat of National Highways at various locations.

Therefore, performance integrity of

penetration grade bitumen was considered doubtful. Attention of highway professionals was attracted to following new concepts.

- Modified binders for wearing coat based on overseas experience.
- Viscosity based bitumen specification in place of penetration based specification of bitumen.

Ministry of Road Transport & Highways entrusted a study to CRRI in 1993 to frame guidelines and specifications for "Use of Rubber and Polymer Modified Bitumen in Bituminous Surfacing" to enhance performance of flexible pavements and delay reflection cracking in surfacing and overlays.

The Key focus of the study was to develop specifications for :

- (i) Crumb Rubber Modified Bitumen
- (ii) Stresses Absorbing Membrane (SAM)
- (iii) Stresses Absorbing Membrane Interlayer (SAMI)

Tentative guidelines on "Use of Rubber & Polymer Modified Bitumen" (IRC:SP:53) were published in 1999. BIS also published Indian Standard "Polymer & Rubber Modified Bitumen Specification (IS 15462:2004) in 2004 after publication of IRC guidelines in 2002.

The key advantages of Modified Bitumen were identified as under :

- Lower susceptibility to temperature variations

- Higher resistance to deformation at high pavement temperature
- Delay of cracking and reflective cracking
- Better age resistance and performance
- Better adhesion between aggregate and binder in presence of water
- Higher fatigue life of mixes
- Overall improved performance of flexible pavement

In view of above cited merits of modified bitumen, technology was adopted by highway professional for various road projects including NHDP corridor in India. Surfacing constructed using modified bitumen conforming to IRC:SP:53:2002 performed better under heavy traffic conditions. Some of roads, where modified bitumen was used are listed below.

1. NH-2 Agra to Dhanbad & Etawah to Chakeri
2. NH-1-Jalandhur Amritsar
3. Ambala – Chandigarh Express Highway
4. Delhi-Ghaziabad Express Highway
5. Gurgaon – Faridabad Expressway.
6. Bihar East West NH
7. Khajuraho Airport
8. Mumbai Airport Runway No.1
9. East-coast Road (Mahabalipuram to Pondicherry)
10. NH-8 (DaulaKuan–Gurgaon Toll Road)
11. Vijayawada-Chikaluripet Section of NH-5
12. Agra-Gwalior
13. Ahmedabad-Vadodara Expressway Phase-I & II
14. Agra-Gwalior
15. Ongole-Nallore
16. Agra to Dholpur
17. Coimbatore Bypass
18. Palanpur to Deesha

The Indian standard of penetration grade paving bitumen was revised in 2006 after extensive deliberations in PCD 6

Committee meeting. Subsequently, Viscosity based bitumen specification was introduced. IS 73:2006 entitled "Paving Bitumen Specification" was published in year 2006. Standard specified four grades such as VG 10, VG 20, VG 30 & VG 40 for road construction in Indian. This standard was revised in 2013 with minor modification as recommended by IIT Chennai to PCD 6 Committee of BIS, based on a laboratory study.

Refineries produced mainly two grades of bitumen till 2013. These were VG 10 and VG 30 conforming to IS 73 : 2006. VG 10 was used in place of 80/100 grade bitumen and VG 30 was used in place of 60/70 grade bitumen. In view of better performance modified bitumen was preferred on majority of highways till 2014.

Indian Road Congress (IRC) published "Tentative Guidelines for the Design of Flexible Pavements in 2012 (IRC:37:2012) and recommended use of VG 40 grade bitumen in conformity of IRC 111:2009 guidelines. It is also stated that research scheme R-54 of MORT&H dealing with "Use of Rubber & Polymer Modified Bitumen in Bituminous Road Surfacing" conducted by CSIR-CRRI reveals that life of surfacing can be enhanced by 2 to 3 years. It is stated that DBM below the wearing coat should have a stiffer binder such as VG 40 for heavy traffic. Criteria for selection of binder for bituminous mixes are also given in IRC 37: 2012 for Design and construction of highways in India. In wearing coat CRMB/PMB is reported better binder due to improved fatigue life and resistance to stripping, aging and also resistance to rutting and deformation. Contrary to recognition of the fact of better performance of PMB/CRMB in wearing coat, VG 40 is

recommended for wearing coat also where maximum average temperature is $>40^{\circ}\text{C}$. However, studies have not been conducted on performance of VG 40 grade bitumen in wearing coat for a climate of high temperature and heavy traffic condition.

Following facts are needed to be considered for selection of binder for bituminous wearing course as well as binder courses.

- DBM and BC mixes prepared with available VG 40 grade bitumen do not meet requirement of resilient modulus values at pavement design temperature as given in IRC:37:2012.
- Fatigue life of DBM and BC mixes prepared using VG 40 bitumen is lower than VG 30 and modified bitumen mixes.
- The fail temperature of VG 40 bitumen is below 720°C , while pavement temperature in India has been observed up to 760°C at various locations. Therefore, VG 40 bitumen is not appropriate binder for entire country.
- BIS did not consider values of resilient modulus of mixes prepared with viscosity grade binder during formulation of standard.

Recommendations :

1. Instead of typed and grade of binder, NHAI and MORT&H may specify minimum requirement of fail temperature of binder and resilient modulus of mixes. The value of resilient modulus may be achieved either by use of modified bitumen or viscosity grade bitumen.
2. Bituminous wearing coat is subjected to

severe wear and tear by heavy traffic as well as daily and seasonal variation of temperature. Therefore, wearing coat needs a mix of better fatigue life, reduced moisture sensitivity and better resistance to cracking as well as rutting. Modified Bitumen is right binder for wearing coat.

3. The fatigue life of bituminous mix prepared with modified bitumen is observed better than VG 40 grade bitumen.
4. DBM layers may be constructed with high modulus mixes prepared with a binder of appropriate viscoelastic properties (modified all VG 40).
5. Surfacing of National Highways as well as Express way may be constructed with VG 40 to 50 mm thick BC layer containing modified.
6. NHAI should sponsor a study for a comparative performance of Modified Bitumen and VG 40 in different climatic zones and traffic conditions before adopting VG 40 as a binder for wearing coat or structural layers.
7. The use of VG 40 without performance data may be detrimental for various roads such as National Highways, Expressways and State Highways as fail temperature of VG 40 bitumen is $>70^{\circ}\text{C}$.

Celebration of Engineers' Day 2016 & 6th Convocation by The Institution Of Civil Engineers (India)

The Institution of Civil Engineers (India) celebrates Engineers' Day on 15th September every year to commemorate the Birth Anniversary of Sir M. Visvesvaraya the legendary Engineer of our times. This year the Engineers' Day celebrations included the 6th Annual Convocation of the Institution. Celebrating Engineers' day has become a tradition with the Institution as a mark of respect and also as a reminder to the young Engineers to follow the path of the legendary Engineers to give their best to the Society.

The programme was held at the A P Shinde Symposium Hall, NASC Complex, PUSA, Dev-Prakash-Shastri-Marg, New Delhi. The programme started with the Academic Procession entering the Auditorium and the invocation of the Goddess of knowledge and lighting of the ceremonial lamp by the dignitaries on the dias. The Chief Guest for the programme was Prof. Furqan Kumar, Secretary General, Association of Indian Universities who was received with warm floral welcome by Dr. S.L. Swamy, Chairman of the Institution.

Mr. Prithipal Singh, Secretary General ICE(I) delivered the welcome address in which he thanked the Chief Guest for accepting our invitation to deliver the Convocation Address. He welcomed Dr. Kumar as a person of Academic eminence having leadership qualities and exposure

to best global practices. He also welcomed the Chairman Dr. S.L. Swamy and other dignitaries on the dias and off the dias. In his welcome address he added that Engineering Profession was one of the most coveted professions in the society and the progress of any nation can be gauged by the infrastructural development of the country. He advised the young engineers not to compromise at any stage, at any point on any issue where the strength and security of the project was involved. He advised them to give their best to the society and do such works so that the posterity should always thank them for.

Dr. S.L. Swamy, also welcomed the Chief Guest. He informed the gathering that they have achieved another milestone in their academic career. The profession chosen by them was a pious one and demands full dedication and honesty. BY developing the infrastructure the Engineering Fraternity basically gives shape to the history of the nation. In the Code of Ethics laid down by the ICE(I) the Corporate Members are required to utilize their knowledge and expertise for the welfare, health and safety of the community and they should strive to comply with the principles of sustainable development in the performance of their duties. The Corporate Members shall not act in any manner which may cause damage to the reputation of the Institution or which may cause any loss to the Institution financially or otherwise.

While concluding he congratulated all who will be receiving their qualifying certificates and wished them Good Luck in every walk of life. He requested the Audience to watch the Annual Report of ICE(I) for year- 2016 on the screens.

Report of ICE(I)

The Institution known as the Institution of Civil Engineers (India) was established by ICE Society under the Societies Registration Act of 1860 having its Registered Offices at Ludhiana. The MHRD, Govt. of India granted Recognition to the Associate Membership (Equivalent to Degree) and Technician Membership (Equivalent to Diploma) Examinations in Civil Engg. & Architectural Engg. as per syllabus approved by AICTE vide Gazette Notification dated 6th November, 2007.

The Mission of the Institution is to contribute in the strengthening of resources for Civil Engineering and Architectural Engineering and creating an institution of excellence for promoting skill based programs. The institution conducts Examinations twice a year and its Examinations are included in the eligibility qualifications for appearing in the entrance examinations of the various bodies like GATE, CAT, MAT & XAT. The Institution Awards Academic Excellence Awards to the candidates and the best Institutional Member every year.

ICE(I) functions through various Councils to guide its affairs in the respective fields. The Advisory Board consists of various academicians par excellence from the IITs and other institutions of higher

learning which are known as Intellectual Pillars. The candidates conduct Practical and Projects in AICTE approved Institutions as per the requirement of AICTE.

ICE(I) grants various Grades of Corporate Membership which include Honorary Fellow, Fellow, Member & Institutional Member besides enrolling Non-Corporate Members. The Institutional Members provide human support to the candidates.

ICE(I) collaborates at National and International levels having Membership with Engineering Council of India (ECI) Associated Chambers of Commerce and Industry of India (ASSOCHAM) & Quality Council of India (QCI). At International level ICE(I) is a Member of ACECC (Asian Civil Engineering Coordinating Council which is a very prestigious International organization consisting of member countries like America, China, Japan, Philippine, Australia, Korea, Indonesia, Mangolia, Vietnam, Pakistan, Nepal and Bangladesh besides India.

ICE(I) also attended CECAR7 at Hawaii USA. It has been organizing National and International conferences every year. ICE(I) has been empanelled as a National Assessing Body under SDI based on MES by the Ministry of Skill Development & Entrepreneurship, Govt. of India.

(Detailed Annual Report of ICE(I) for the year -2016 appears in the proceedings of the Engineers' Day celebrations published separately).

Annual Convocation

In the Annual Convocation the candidates were conferred certificates and meritorious awards when the candidates presented themselves in their academic robes. The Convocation Address followed there after.

Prof. Furqan Kumar in his Convocation Address congratulated the candidates on their Membership both Associate and Technician with the ICE(I) and also the academic excellence awardees. He was happy to see women members in the gathering and dealt with the question of gender equality and equity. He added that engineering education is one such discipline where women are 15-16%. He appreciated that both Saraswati and Laxmi are important and we should invoke Saraswati in order to reach Laxmi. Of course money cannot buy happiness and our ultimate objective is to be happy and the one way to remain happy was to contribute in the betterment of the society with positive thinking. One should always be positive about one's ability, capabilities and the country. We should always remember our teachers which contributed in our making. He also narrated the story of a disciple who faced many Gurus and the value of one

He wished a bright future and all the best to the candidates present.

Ms. Maya Thakur, Director proposed Vote of Thanks wherein she thanked the Chief Guest for having delivered the Convocation Address which was very illuminating and which will have great impact in the minds of the Audience. She thanked the Chairman, Dr. S.L. Swamy,

Managing Chairman, Sh. P.P. Singh Bindra, Secretary General, Sh. Prithipal Singh for their encouragement and support from time to time. She also congratulated the candidates who received their final pass certificates and wished them Good Luck.

The programme concluded with presentation of memento to the Chief Guest and National Anthem.

ADD TO YOUR VOCABULARY

- **Parking Apron**

A paved or unpaved airfield surface used for fixed wing aircraft parking. The area includes parking lanes, taxi lanes, exits, and entrances. Aircraft move under their own power to the parking spaces, where they may be parked and secured with tiedowns. Parking designed to distribute aircraft for the purpose of increased survivability (dispersed hardstands) are included in this category code. For inventory purposes, only the prepared surface is included.

- **Party Wall**

A shared wall between two pieces of property, most often in row-houses, semi-detached houses, or townhouses. The shared wall generally stands on the property line.

- **Pedestal**

Concrete or built-up metal member constructed on top of a bridge seat for the purpose of providing a specific bearing seat elevation.

- **Plastic Consistency**

Condition in which concrete, mortar, or cement paste will sustain deformation continuously in any direction without rupture.

- **Plinth Area**

The built up covered area measured at the floor level of the basement or of any storey.

- **Porch**

A covered structure supported on pillars or other wise for the purpose of pedestrian or vehicular approach to a building.

- **Post & Beam Construction**

Most common type of wall framing, using posts which carry horizontal beams on which joists are supported. It allows for fewer bearing partitions and less material.

- **Prestressed Concrete**

Concrete in which the reinforcing cables, wires, or rod in the concrete are tensioned before there is load on the member, holding the concrete in compression for greater strength.

- **Random Rubble**

Stonework having irregular shaped units and no indication of systematic course work.

- **Pedestal Pier**

One or more piers built in block-like form that may be connected by an integrally built web between them; when composed of a single, wide block-like form, it is called a wall or solid pier.

AN EVER EXPANDING LIST
OF
RECOGNITION
OF
ICE(I) EXAMINATIONS

[TO BE PUBLISHED IN PART-1 SECTION -I OF GAZETTE OF INDIA]

Government of India
Ministry of Human Resource Development
Department of Higher Education

Shastri Bhawan, New Delhi,
the 6th November, 2007

NOTIFICATION

No.F.24 – 1 / 2007 – TS.III. On the recommendations of the High Level Committee for recognition of Educational Qualifications in its meeting held on 22nd May 2007, the Government of India has decided to give recognition to the Section A & B of Associate Membership course, equivalent to Degree and Part – I & II of Technician Engineers (T) equivalent to Diploma in Civil Engineering and Architecture Engineering Courses conducted by the Institution of Civil Engineers (India), Ludhiana (Punjab) as per syllabus approved by All India Council for Technical Education (AICTE) w.e.f. the academic session 2007 – 2008 for the purpose of employment to the posts and services under Central Government in the appropriate field. It is subject to the conditions that the total number of candidates who can be admitted for the said examination would not exceed the authorized strength of the concerned Institutions with which Institution of Civil Engineers (India), Ludhiana (Punjab) has entered into Memorandum of Understanding (MOUs). A review in respect of recognition of educational qualifications shall be made by Ministry of Human Resource Development after one year through All India Council for Technical Education (AICTE).

The Times of India organized a programme on Transformational School Principals New Role in a New Age on 30th August, 2016 at Le-Meridien, New Delhi in which Principals, Academicians & Administrators participated in large numbers. ICE(I) also participated in this great event.

SEPTEMBER T - 2016**(i)****ICE(I) Celebrates Engineers' Day-2016**

ICE(I) Celebrated Engineers' Day & 6th Annual Convocation on 15th September, 2016 in which Prof. Furqan Qamar, Secretary General, Association of Indian Universities delivered the Convocation Address.

Alumni.....A Lifelong Relationship ! Keep it alive!

Alumni Engagement is at the core of the Institution of Civil Engineers (India). Keeping this in mind, the institution has worked towards building a strong alumni community and will continue to work in this direction.

“Alumni are the true brand ambassadors of their Alma Mater and represent it everywhere they go. They truly reflect the values of the institution from which they have graduated.

In order to actively engage our alumni, The Institution of Civil Engineers (India) encourages alumni participation to bring them together by providing a forum for meeting and exchange of views, to facilitate professional networking for mutual benefit and to contribute to the Institution's efforts for achieving excellence in academics and research through sharing knowledge and expertise of its members in areas pertaining to academics, infrastructure, industry interactions and others, if any.

The Alumni are also invited for seminars, conferences, advancement programs etc. to enhance their learning's which they can further use in their own respective work areas.

Keep reading this column for more news and updates on our Alumni.....!!.

The Members, who have not yet enrolled, may get in touch with us on icei.alumni01@gmail.com or at Delhi Office.
